Transparent Video Screen: To See and To Be Seen

Transform your storefront into a media channel. Our transparent displays integrate seamlessly into your façade, turning it into a powerful attention-grabbing tool—without compromising interior brightness or the view to the outside.

High brightness, flawless image quality: your message stands out without ever blocking visibility. XMS micromesh technology creates a striking visual effect from the street while preserving comfort and openness from within. The result: a storefront that attracts, engages, and leaves a lasting impression.

Turn your storefront into your best salesperson.

LED Mesh: Screen Power, Total Freedom

Fully modular. Starting from 50 cm wide strips, build installations up to 3 meters high—with no limit in length. The integrated metal frame simplifies deployment and reduces installation costs.

Intuitive control: Display your videos, promotions, and messages in just a few clicks from your workstation. With cloud-based management, centralize control of all your screens, wherever they are installed.

One screen or many — endless possibilities.

Your communication, under control.
